PROFILE

Aspiring Frontend Developer with hands-on project experience building web applications using React.js and Next.js. Developed a POS system with product management and cashier functionality, integrated with Supabase and deployed on Cloudflare Workers. Eager to strengthen my frontend development skills and contribute to building user-friendly web applications.

WORK EXPERIENCE

Store Manager June 2023 - Sebtember 2026

Mixue Ice Cream & Tea

- Managed daily store operations to ensure smooth and efficient service.
- Prepared ice cream and beverages while maintaining product quality and consistency.
- Handled customer concerns and resolved operational issues efficiently.
- Coordinated daily tasks and supported team members to maintain service standards.

PROJECTS

POS System — Personal Project

Next.js · TypeScript · Supabase · Tailwind CSS · Cloudflare Workers

- Developed a web-based point-of-sale (POS) application for beverage store operations.
- Built a cashier interface with cart management, order summary, and payment calculations.
- Implemented product and modifier management with Supabase integration.
- Deployed the application on Cloudflare Workers for online access and testing.
